### Introduction

The substantial benefits of DecisionSpace® Desktop software are also realized when users learn to use it effectively. This guide provides a roadmap for DecisionSpace Desktop software in a production environment.

### Workflow Optimization

**Level 1**

- **Client Workflows**
  - In Decisionspace Desktop Environment
  - To ensure current workflows are in their existing technologies. Consultant then translates workflows to Decisionspace Desktop software workflows. This process can be completed by the client’s current onsite consultant.

- **Benefits**
  - Client perceives better understanding of current workflows, data, time, and resources.
  - Client can report insights and opportunities on the performance of their workflows.

**Level 2**

- **Consultant**
  - Vendor-neutral workflows.
  - Consultant can optimize services and identify potential inefficiencies, gaps, and duplications.

- **Next Steps**
  - Client assigns the key team members who will participate in Phase I mentoring.

### Training: Geoscience

**Courses**

- **Geoscience Courses**
  - Earth Modeling
  - Integrated Interpretation
  - Lithology®
  - Dipmeter®
  - PostStack™/Pal™/SpecDecomp ®
  - Well Seismic Fusion™
  - SoilTest®

- **Benefits**
  - Extensive collection of public and private courses
  - Comprehensive training available for specific applications or software

### Training: Drilling

**Courses**

- **Drilling Courses**
  - COMPS™
  - Multiverse®
  - Drillworks®
  - WELLPLAN™
  - Drillworks®

- **Benefits**
  - Comprehensive training available for specific applications or software

### Complex Play and Scenario-Based Workflows

- Asset teams can select from a Landmark workflow portfolio or define a client-specific workflow or scenario. Client can consider a monitoring engagement for assisting the asset team on a specific challenge.

### Training Website

- Landmark Training website for courses available in your region.
- Visit the Landmark Training website at www.landmarkengineering.com for courses available in your region.

### Contact Information

- **Contact**: Landmark Account Manager, who will refer to Regional Services Manager.

### Price Information

- Prices are available on request.

---

**Notes**

- For accurate information, contact your Landmark representative or visit halliburton.com.

---

**Technology Services**

- Consultant serves as a conduit between client and Landmark R&D for software updates and product enhancements.

### Assessment Period

- Client works independently with the software in their own environment.

---

**Technology Services**

- Consultant serves as a conduit between client and Landmark R&D for software updates and product enhancements.
